                                                                                                                         superior anti-fungal (especially anti-Candidal) and anti-bacterial activity, particularly on a weight basin, compared to the longer, naturally occurring histatins. Peptides containing D-residues are also more resistant to degradation than L-amino acid versions.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                            Score

GENERAL IMPORMATION:

APPLICANT: NERI, Dario

APPLICANT: TARLI, Lorenzo

APPLICANT: VITI, Francesca

APPLICANT: BIRCHLER, Manfred

TITLE OF INVENTION: SPECIFIC BINDING MOLECULES FOR SCINTIGRAPHY

FILE REFERENCE: SCH-1773

CURRENT-APPLICATION NUMBER: US/09/075,338C

CURRENT FILING DATE: 1998-05-11

NUMBER OF SEQ ID NOS: 34

SOFTWARE: Patentin Ver. 2.1

SOLUTION: APPLICATION OF SEQ ID NOS: 34

CURRENT: APPLICATION OF SEQ ID NOS: 34

CURRENT FILING DATE: 1998-05-11

SOLUTION: APPLICATION OF SEQ ID NOS: 34

CURRENT: APPLICATION OF SEQ ID NOS: 34

CURRENT APPLICATION: Description of Artificial Sequence: anti-ED-B

OTHER INFORMATION: antibody clone
